

Robotics require a smooth, flat and durable surface for optimal performance.

**Smooth
Surface**

**Reduced
Wear/Maintenance**

**Reduced
Materials Spillage**

PrimX industrial floors provide the optimal concrete surface for distribution, warehousing and manufacturing. PrimX has no joints, no curling, and no limitations on network assembly and traffic patterns. Transported goods stay on the vehicle without concern for spillage. Vehicles endure less wear and tear, as the seamless surface is easier on wheels and chassis.

A proven system with over 160 million square feet in service, PrimX has been trusted by leaders in logistics and distribution for over a decade.

When choosing a PrimX floor, you can expect:

- The highest performing industrial surface available.
- Minimized operational downtime.
- Reduced maintenance costs for drive units.
- Decreased joint maintenance costs over the life of the floor.
- Superior flatness over time compared to traditional concrete with no deformation or curling.
- Transferrable 5-year warranty protects owners/tenants from unexpected repairs.
- A reduction of over 1,000,000 lbs. of CO2 on a typical, 250,000 square foot warehouse.
